# VERIFIED, UPDATED AND ENRICHED DATA

**Abbrevia** offers a range of services starting from analysis up to credit management.

The added value of Abbrevia information is our in-depth work carried out by **investigative team**, which verifies and update data coming from public sources, integrating them by **reputational and informal information**, thus providing instant and detailed information about the subject being investigated on shared drivers.

# ADDED VALUE FOR THE NPL MARKET

For years, Abbrevia has been working with **major players** in the **NPL** and **UTP** market, in the various stages of management.

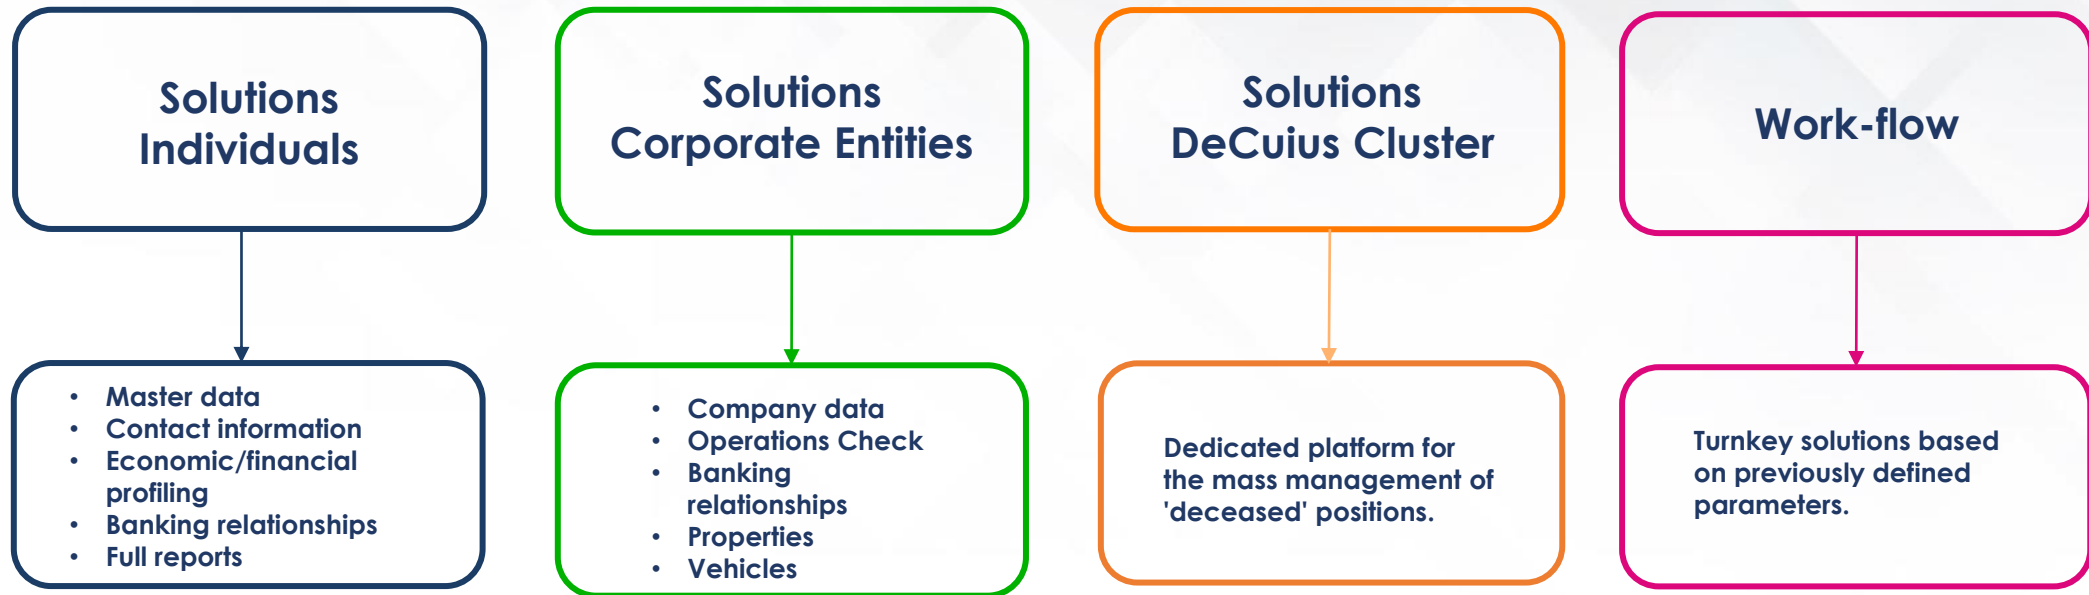

The exponential growth of the NPL market - and more recently of the UTP market - drove Abbrevia to **specialise** and constantly **search for** new information solutions.

We believe that **partnerships** between Servicers and Info Providers are essential to **optimise** resources and improve performance in credit recovery and management.

# MODULAR AND TESTED SOLUTIONS ACCORDING TO SPECIFIC SERVICER REQUIREMENTS

# THE RIGHT SOLUTION FOR YOUR NEEDS
